Findings

Shimizu was clustered into the progressive stoppers for both k = 2 and k = 3, although margins were very close against other clusters. Although mostly known as a fullback, she spent significant time as a center back this season for West Ham United. Her passing saw high share forward and progressive, while her carrying saw high share into the final third, but her pressures applied right after losing the ball were low, her receiving and defensive actions were mostly at lower locations, apart from tackles, interceptions and recoveries.
