Player counts

In this project, there are a total of 43 attacking center midfields considered, with

- 21 attacking center midfields in 12 teams in the English FA Women's Super League
- 19 attacking center midfields in 12 teams in the German Frauen Bundesliga
- 26 attacking center midfields in 16 teams in the Spanish Liga F
- 17 attacking center midfields in 10 teams in the Italian Serie A Women

Results

Results for 2 clusters

Breakdown of results by league

league	FA Women's Super League	Frauen Bundesliga	Liga F	Serie A Women
kmeans_2_cluster				
0	7	3	7	4
1	7	4	8	3

The split is quite equal for all leagues.

Breakdown of results by features

- Cluster 0 midfielders involved in higher up the pitch positions, including receiving, pressing, commiting fouls, and other vulnerability features. They also made counterpress actions at higher rates. Passing was their main progression method.
- On the other hand, cluster 1 midfielders made more ground passes and carried longer. They progressed more by carrying. Average press time for these players was longer.

Therefore, based on these results,

- Cluster 0 attacking midfielders can be seen as advanced high pressing operators, acting as shadow strikers.
- Cluster 1 attacking midfielders can be seen as deeper distributors and carriers, although can still be seen as advanced playmakers.

Breakdown of results by players

Findings and radar plots for each attacking center midfielder are in their own files:

- Aitana Bonmati - Barcelona
- Julia Grosso - Juventus
- Jill Roord - Manchester City
- Svenja Huth - VfL Wolfsburg
